***Reason for allowance***

The following is an examiner's statement of reasons for allowance:

The prior art of records fails to teach or fairly suggest a method of assembling a semiconductor package comprising forming a first inductor within the semiconductor package; forming a second inductor within the semiconductor package and in parallel with the first inductor, wherein the first and second inductors are formed within the semiconductor package so that an interfering magnetic signal induces a common-mode signal in the parallel combination of the first and second inductors as called for in claim 22. Therefore, claims 22-39 are presently allowed.

***Conclusion***
